Contents

| | | |
|-----------|---|-----------|
| I | Introduction | 5 |
| II | Theory | 9 |
| 1 | Introductory Remarks | 11 |
| 2 | Electronic Structure of Surfaces | 13 |
| 2.1 | Electronic structure of crystals | 13 |
| 2.2 | Strong-coupling approximation | 13 |
| 2.3 | Theory of inhomogeneous electron gas | 13 |
| 2.4 | Magnetic properties of surfaces | 13 |
| 3 | Surface Quasiparticles | 15 |
| 3.1 | Plasmons | 15 |
| 3.2 | Excitons | 15 |
| 3.3 | Phonons | 15 |
| 3.4 | Polaritons | 15 |
| 4 | Interaction of an External Charge with a Surface | 17 |
| 4.1 | Image forces | 17 |
| 4.2 | Contact difference of potentials | 17 |
| 4.3 | Electrodynamics of a metal-vacuum system | 17 |
| 5 | Adsorption of a Single Atom | 19 |
| 5.1 | Gurney model | 19 |
| 5.2 | Anderson Hamiltonian | 20 |
| 5.2.1 | Kondo problem | 20 |
| 5.2.2 | Weak-coupling limit | 20 |
| 5.2.3 | Strong-coupling limit | 20 |
| 5.2.4 | Exact solution | 20 |
| 5.2.5 | Excited states | 20 |
| 5.3 | Role of the image potential | 20 |
| 5.3.1 | Local polaronic model | 20 |
| 5.3.2 | Variational method | 20 |
| 5.3.3 | Excited states | 20 |
| 5.4 | Inhomogeneous electron gas | 20 |
| 5.5 | Summary | 20 |

| | | |
|-----------|---|-----------|
| 6 | Interaction between Adsorbed Atoms | 21 |
| 6.1 | Mechanisms of interaction between adatoms | 21 |
| 6.2 | Indirect interaction: a near zone | 22 |
| 6.3 | Indirect interaction: asymptotics | 22 |
| 6.4 | Electrostatic interaction | 22 |
| 6.5 | Superposition of interactions | 22 |
| 6.6 | Dynamic interaction | 22 |
| 7 | Adlayers of a Finite Coverage | 23 |
| 7.1 | General remarks | 23 |
| 7.2 | Relaxation and reconstruction | 23 |
| 8 | Adsorption on Semiconductors | 25 |
| 9 | Emission Electronics | 27 |
| 9.1 | Thermoemission | 27 |
| 9.2 | Field–electron emission | 27 |
| 9.3 | Photo–electron emission | 27 |
| 10 | Lattice–gas Models | 29 |
| 10.1 | Langmuir model | 29 |
| 10.2 | Ising model | 29 |
| 11 | Phase Transitions | 31 |
| 11.1 | Smooth surface | 31 |
| 11.1.1 | Peierls–Landau theory | 31 |
| 11.1.2 | Melting of a 2D crystal | 31 |
| 11.1.3 | Experimental results | 31 |
| 11.2 | Commensurate–incommensurate transitions | 31 |
| 11.2.1 | Frenkel-Kontorova model | 31 |
| 11.2.2 | Sin-Gordon equation | 31 |
| 11.2.3 | Peierls-Nabarro barriers | 31 |
| 11.2.4 | Soliton structures | 31 |
| 11.2.5 | Aubry transition | 31 |
| 11.2.6 | Generalizations of the FK model | 31 |
| 11.2.7 | Two–dimensional FK models | 31 |
| 12 | Mechanisms of Growth | 33 |
| 13 | Kinetics of Adsorption and Desorption | 35 |
| 14 | Energy Exchange in Adsorbed Layers | 37 |
| 14.1 | Vibrations of adatoms | 37 |
| 14.2 | Friction coefficient | 38 |
| 14.3 | Stimulated processes | 38 |
| 15 | Dynamics of Surface Processes | 39 |

| | |
|---|-----------|
| <i>CONTENTS</i> | 3 |
| 16 Surface Diffusion | 41 |
| 16.1 Diffusion of a single adatom | 41 |
| 16.2 Collective diffusion | 41 |
| 16.2.1 Different diffusion coefficients | 41 |
| 16.2.2 Diffusion in the LG model | 41 |
| 16.2.3 Diffusion in the FK model | 41 |
| 16.2.4 Diffusion of clusters | 41 |
| 17 Heterocatalitic Reactions | 43 |
| | |
| III Experiment | 45 |
| 18 Introductory Remarks | 47 |
| 19 Classification of Experimental Methods | 49 |
| 19.1 Emission methods | 49 |
| 19.2 Spectroscopic methods | 49 |
| 20 Measuring of the Work Function | 51 |
| 21 Scanning Tunnel Microscopy | 53 |
| 22 Field Electron Microscopy | 55 |
| 23 Field Ion Microscopy | 57 |
| 24 Mass-spectroscopy Methods | 59 |
| 25 Electron Spectroscopy | 61 |
| 26 Photoelectron Spectroscopy | 63 |
| 27 Vibrational Spectroscopy | 65 |
| 28 Conclusion | 67 |
| References | 67 |
