Dear Dr Gvozdevsky

As you may know, we award the Luckhurst-Samulski Prize for the best paper published each year in the journal Liquid Crystals. You will find a full description of the Prize and its terms and conditions on the Journal's website. The winner of the 2014 Prize was announced at the European Conference on Liquid Crystals in Manchester as Hideo Takezoe and Fumito Araoka for their paper entitled *Polar columnar liquid crystals*.

Although you did not win the Prize, I am pleased to inform you that your paper (*Influence of the anchoring energy on jumps of the period of stripes in thin planar cholesteric layers under the alternating electric field*) was one of eight others that were highly commended by the Selection Committee, and will be referred to in an Editorial in the November issue of the Journal. The nine papers shortlisted for the Prize, from over 200 published, were truly of the highest quality and the Committee found choosing between them a very difficult task.

I do hope that you will submit more of your work to Liquid Crystals for publication.

With best wishes.

Yours sincerely

Corrie
